The No.1 Roofing Sheet Company in North-East India

DynaRoof the pioneer of new age colour-coated roofing sheets. We are the only organization in North-East India, dedicated to the manufacturing of colour-coated roofing and cladding profiled sheets. Our manufacturing units are equipped with the latest state-of-the-art profiling machines that provide the most suitable and best engineered products. With over 56 years of industry presence, the mainstay of our company has been our customers. Meeting their every roofing need is our prime responsibility. From buying to installation and product services by the Roof Squad, DynaRoof's relationship with its esteemed customers is everlasting, just like our roofing sheets.

Why you should trust DynaRoof

Expertise and Experience

With 56 years of industry experience we are pioneers in manufacturing colour-coated roofs and wall cladding.

High Quality

Our raw materials are sourced from leading steel manufacturers across India and overseas. Our sheets are profiled in our own manufacturing facility using cutting-edge international technology.

Fastest Delivery Time

Our factory located in Meghalaya has an installed capacity of 20,000 MT PA and we use a well-knit distribution process.

Competitive Edge

We offer the best products at the best possible prices.

All Facilities under One Roof

From designing, manufacturing to fixing, servicing, we have it all under one roof.

Range of Products

Our products range from Pre-Painted Galvanized and Galvalume sheets to bare Galvalume sheets and Steel Tiles profile sheets.

Why DynaRoof stays stunning for years

THERMAL & CORROSION PROOF
WEATHER PROTECTION

Extreme Endurance

DynaRoof withstands chipping, cracking, peeling and doesn't fade or lose luster.

Aesthetic Appeal

Variety of shades and overall finish due to SMP and RMP coatings keep it looking beautiful over the ages.

Easy on Environment

DynaRoof is 100% recyclable like other steel products and does not harm the planet.

Thermal Resistant

It reflects great amount of heat and light and can withstand extreme weather, be it heat or hail, without discolouration.

Anti-Corrosive Coatings

RMP/SMP coatings make it 2-3 times more corrosion resistant than ordinary galvanized sheets.

Low Maintenance

Its anti-corrosive and thermal resistant properties make it low-maintenance and just by cleaning debris accumulated on it annually, the roof stays in top condition.

Installation Support

Only DynaRoof has Roof Squad, a full fledged team of highly skilled workers who can install roofs and provide all other solutions.

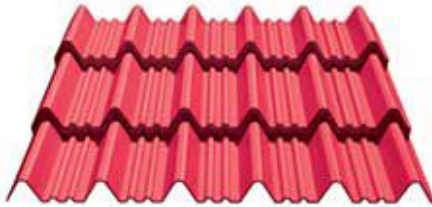

Product Specification

Substrate Material:	Aluminium and Zinc alloy coating with steel base. (55% Al, 43.5% Zn and 1.5% Si)
Alloy Coating:	AZ 150 or AZ 100
Yield Strength:	Minimum 550mpa
Thickness:	0.40 mm & 0.50 mm
Standards:	As per ASTM A792/A792M & AS 1397
Paint System:	RMP/SMP
Characteristics:	Top Coat : 18-20 micron
Primer Top Coat:	5-7 micron
Back Coat:	6-8 micron
Primer Back Coat:	3-4 micron

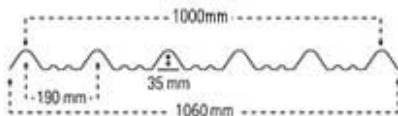

* Other paint system viz. Super Durable Polyester (SDP), Poly vinylidene Flouride (PVDF) can be supplied as per customer's requirement.

Profiles available in all colours

- * More colours can be provided as per standard RAL shades
- * Colours may vary from the shades shown above

ROOF SQUAD

Roof Squad is an in-house team from DynaRoof comprising of dedicated professionals for the fixing of roofing and cladding products. DynaRoof's journey with its customers does not end with the purchase of roofing sheets. Instead we provides assistance from buying to installation. Thus, we ensure that not only do you get roofing sheets of the highest quality, but also avail expert installation undertaken by technically sound professionals. Our roof experts are available for inspection, advice, and installation facilities throughout the year. We have raised the bar of roofing service with our spick-and-span installation services. Superior craftsmanship and exceptional service have been the cornerstones of Roof Squad since day one.

Advantages of Roof Squad

A professionally trained squad will inspect and install your roof

Only superior quality products will be used to ensure perfect fitting

Get the aesthetic appeal which only our qualified team can give you

Get it customized according to your needs so that your roof is leakage and seepage proof

INSTALLATION BY ROOF SQUAD ADVANTAGES

ROOF SQUAD TEAM	LOCAL UNSKILLED WORKERS
1) Our installation teams are technically trained and experienced personnel.	1) Lack the necessary training and experience resulting in higher wastage, increased cost and poor aesthetics.
2) DynaRoof uses imported Xylan coated screws to prevent rusting of purlins and roofing sheets.	2) Local accessories are used - will cause rusting and damage to purlins and roofing sheets.
3) Installation work is undertaken within specified timelines as per customer requirement.	3) No such procedures are followed - no guidelines adhered.
4) DynaRoof provides one year service warranty against leakage and seepage.	4) No warranty provided against leakage and seepage.
5) Safety norms are maintained (wearing of helmet, harness etc.).	5) Safety norms are not adhered to - hazardous working conditions leading to accidents.
6) Site supervision by our senior executives.	6) No site supervision - resulting in poor workmanship & delayed timelines.
7) 24 x 7 Helpdesk available.	7) No Helpdesk.
